BAUERFEIND.

BY PEOPLE FOR PEOPLE.
FOR A BETTER QUALITY OF LIFE.

 Health Canada	Medical Device Establishment Licence	Liscence No 4678	7017006 CANADA INC. O/A GALIEN
---	---	---------------------	-----------------------------------

Bauerfeind AG is one of the world's leading manufacturers of medical aids. With our products and treatment concepts, we enable people to be more active and thus make an important contribution toward maintaining and restoring health.

MEDICAL KNOW-HOW AND TECHNICAL EXPERTISE

Bauerfeind combines decades of expertise in technology and manufacturing with innovation: the tradition of a medium-sized, family-run business with a global mindset. Bauerfeind's specialists have worked very closely with physicians, scientists, and developers right from the start. The result: patented, award-winning products and services.

From the thread to the completed product, our compression stockings are developed and manufactured in Germany.

EFFECTIVE VARIETY

Our VenoTrain compression stockings cover all uses/indications in modern compression therapy, offering medically proven effectiveness and unique material properties.

Thanks to the wide range of colors available, the compression products blend seamlessly into their users' everyday lives and can be combined with various fashion styles. For prevention or the treatment of lymphedema: the indication-specific solutions include a wide variety of circular knit and flat knit designs that are available as custom-made or standard products.

QUALITY WITHOUT COMPROMISE

Bauerfeind products don't simply meet standards – they fulfill the most stringent requirements in terms of quality, effectiveness, and wearing comfort. Regular inspection procedures ensure that our products earn the seals and marks of successful testing.

THE THREE PILLARS OF COMPRESSION THERAPY

AN ALL-IN-ONE SOLUTION

Bauerfeind products meet particularly high standards, allowing you to provide your customers with the best possible treatment. VenoTrain compression stockings offer indication-specific solutions for all areas of treatment in modern compression therapy: whether for prevention, for phlebological standard or special cases, or for conservative treatment of lymphedema or lipedema. The circular knit or flat knit compression stockings offer medically proven effectiveness, unique material properties, and a patient-oriented modern design.

01 TREATMENT IN PHLEBOLOGICAL STANDARD CASES

The phlebological standard case refers to **mild to moderate venous disorders**. It also includes situations in which there is a particular risk for the development of vein problems, such as during pregnancy or traveling. VenoTrain compression stockings improve venous activity and combat venous leg problems.

02 TREATMENT IN PHLEBOLOGICAL SPECIAL CASES

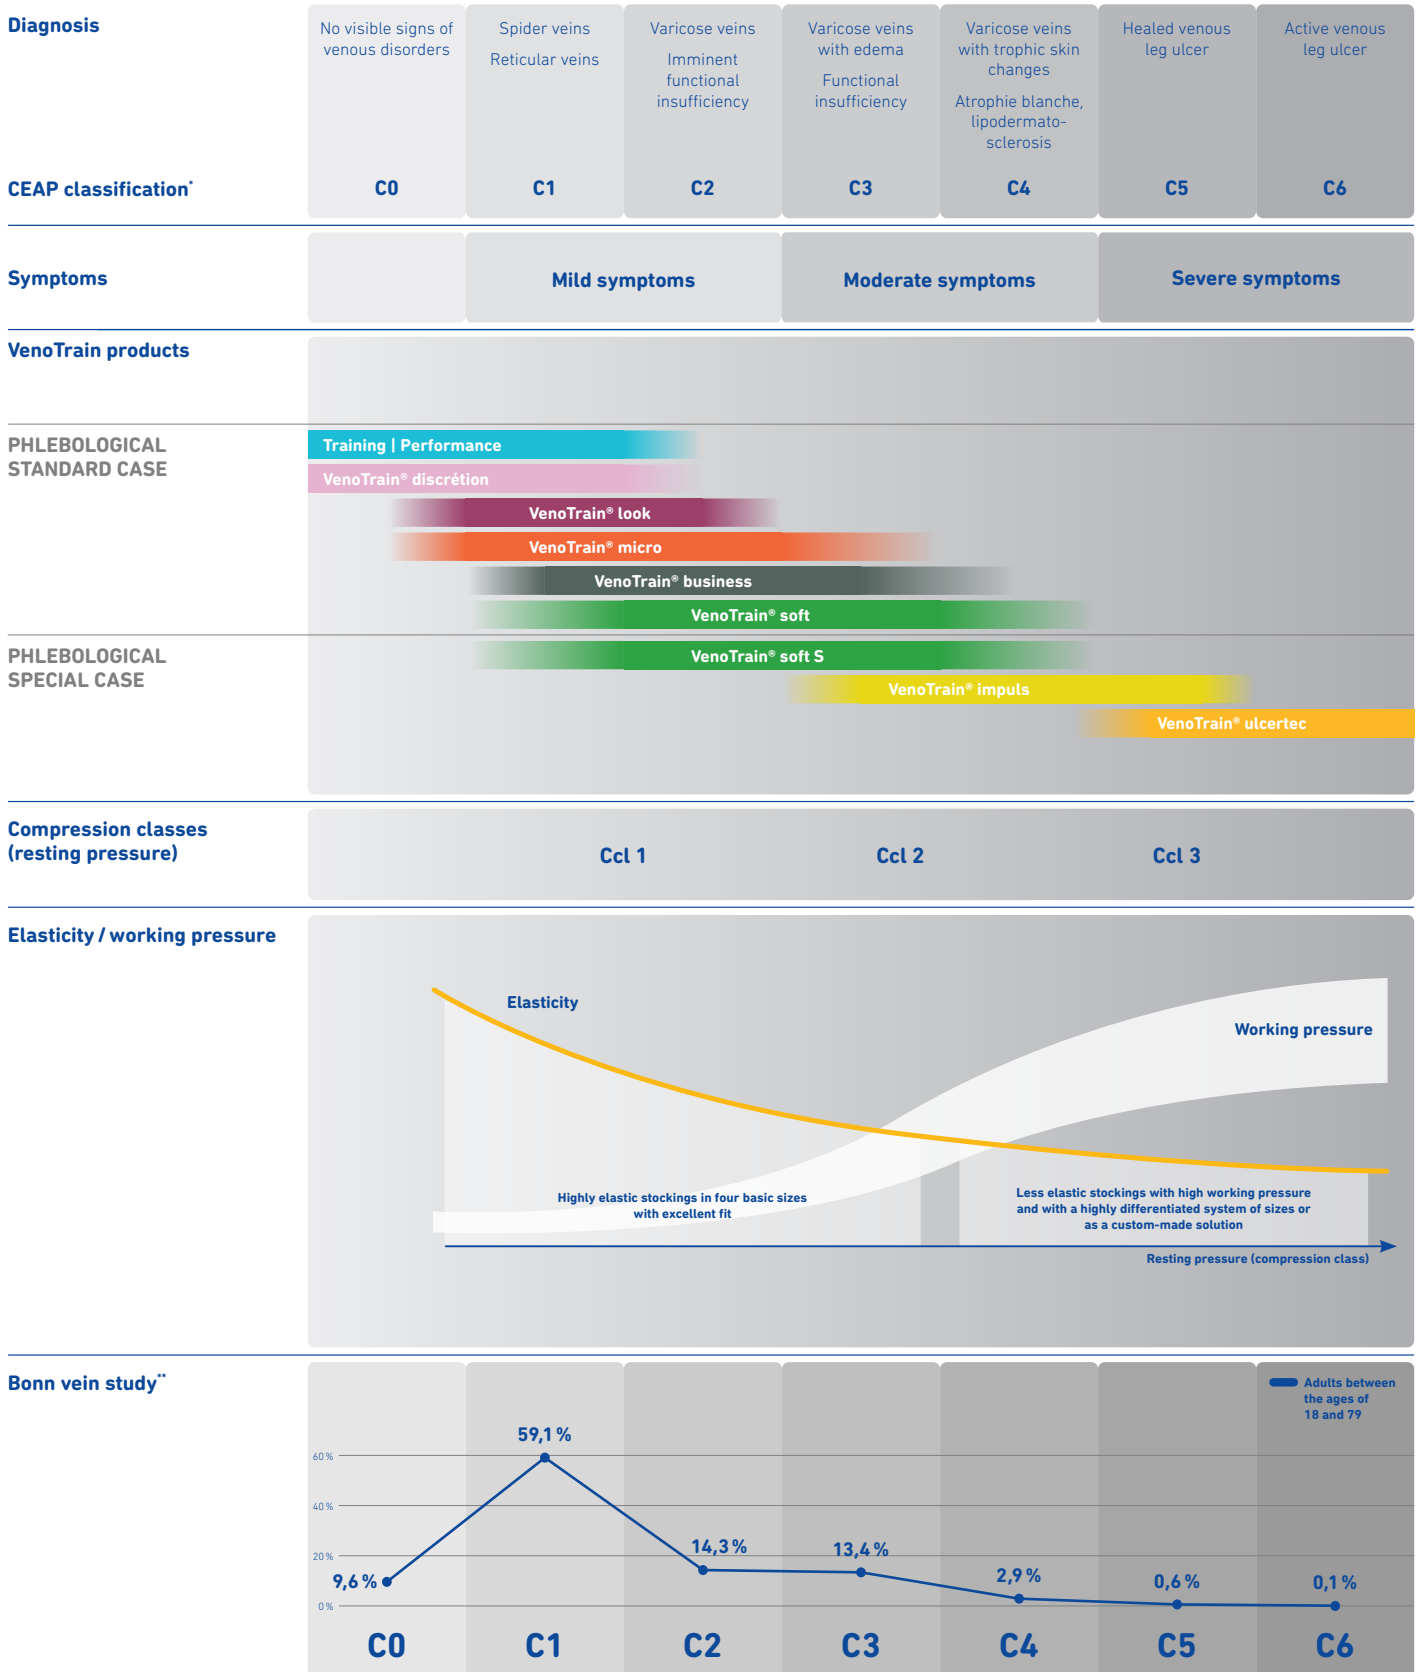

Some patients with vein problems have **special requirements** that call for compression stockings with unique modes of action and properties. These requirements can be very diverse. That is why the VenoTrain range offers compression stockings especially for patients with restricted mobility, dry skin, particularly weak veins, or open wounds.

03 LYMPHOLOGICAL TREATMENT

Lymphedema or lipedema patients are generally dependent on compression therapy for their entire lives. The effectiveness and wearing comfort of the stockings is therefore particularly important, significantly impacting the patient's quality of life. VenoTrain **flat knit and circular knit products** provide the required therapeutic compression, while offering a unique wearing comfort, and help the patient live an active life.

SYSTEMATIC APPROACH TO COMPRESSION

* Partsch, H.: Klassifikation von chronischen Venenerkrankungen heute, Vasomed 1 / 2003

TREATMENT IN PHLEBOLOGICAL STANDARD CASES

FOR MILD TO MODERATE VEIN PROBLEMS

The phlebological standard case refers to **mild to moderate venous disorders**. It also includes situations in which there is a particular risk for developing vein problems, such as during pregnancy or traveling. Venotrain compression stockings have been designed precisely to improve venous activity and combat venous leg problems.

COMPRESSION SOCK TRAINING

MUSCLE TUNING MADE EASY!

Bauerfeind's Compression Sock Training supports your calf muscle and lower leg, and stimulates the parts of the muscles that are under particular stress. In addition to providing special benefits, the socks help to prevent premature fatigue and muscle cramping.

The result: a lower risk of injury and more energy throughout your activities.

CARE INSTRUCTIONS

FEATURES

- **Set pressure profile** – consistent therapeutic gradient (Ccl 1 = 20-30 mmHg) for improved circulation
- **Lycra® sports material** – gentle on the skin and breathable
- **Taping zone** – more stability for the ankle thanks to a patented design
- **Precision fit** – anatomically correct for left and right leg
- **Muscle tuning zone** – for reduced muscle vibrations and thus less fatigue
- **Protective zone** – for less pressure and rubbing on the Achilles tendon
- **Shock-absorbing cushioning** – for greater comfort and protection

COMPRESSION SOCK PERFORMANCE

RUNNING MADE EASY!

The Bauerfeind Compression Sock Performance exerts noticeable compression on the leg that complies with medical standards and effectively improves circulation. This ensures an optimal blood supply to the muscles and helps them perform for longer, particularly in endurance disciplines such as cycling or marathons.

The result: More energy reserves for long distances and quicker regeneration.

VenoTrain® soft S

COMFORT IN THE EVENT OF RESTRICTED MOBILITY

Based on proven VenoTrain soft quality which offers a gentle massage effect to stimulate the blood flow, the VenoTrain soft S also takes into account special requirements of people who spend most of their time seated.

The wide heel and comfortable instep area ensure that the foot, which is angled during sitting, has enough space, and that no creases can develop.

The robust knitted fabric can withstand plenty of wear, and can also be easily put on by care staff.

STANDARD COLORS

VenoTrain® impuls

POWERFUL SUPPORT FOR PARTICULARLY WEAK VEINS

Produces a particularly deep action by exerting high working pressure with even the slightest muscle movements. Easy to put on and breathable thanks to microfibers.

Highly effective for advanced vein problems, post-thrombotic syndrome, follow-up care for healed ulcers, and therapy in the early stages of lymphedema.

STANDARD COLORS

FEATURES

- The short-stretch knitted fabric generates a high working pressure with even the slightest muscle movements
- Skin-friendly microfiber material makes the product breathable and ensures temperature control

DETAILS

COMPRESSION CLASSES

- Ccl 2 = 30-40 mmHg
- Ccl 3 = 40-50 mmHg

TOE closed, open

MATERIAL CONTENT

- Ccl 2: 80 % polyamide, 20 % elastane
- Ccl 3: 75 % polyamide, 25 % elastane

VenoTrain® ulcertec

FOR VENOUS LEG ULCERS

The combination of an overstocking with a patented rhomboid knitted fabric and a skin-friendly liner for holding the wound dressing in place makes this compression stocking easy to put on without any need for assistance.

The liners are also ideal for providing a continuous low level of compression during the night. These are available to order separately in a pack of three and are suitable for washing at high temperatures.

FEATURES

- Coordinated compression of overstocking and liner
- Unique compression profile that accelerates the healing process while ensuring exceptional patient comfort
- Differentiated treatment based on two designs within one compression class
- Liner with gentle compression providing a compression pressure in the lower range of compression class 3 in combination with the overstocking

LYMPHOLOGICAL TREATMENT

Bauerfeind has a wide range of compression products for lymphological conditions which take into account the patients' different requirements.

Thanks to our custom-made **VenoTrain curaflow** flat knit products, we can offer lymphatic patients perfectly tailored solutions with more than 1,000 different options of combining products and additional features.

The beneficial therapeutic features of the range include the knitted fabric's high microfiber content, the flat sensitive stitching, and special comfort zones such as the extra-soft area behind the knee.

Comprehensive information and product details of our lymphology portfolio can be found in the Lymphology Product Catalog.

ACCESSORIES

THE PERFECT ADDITION FOR EVERYDAY USE

These handy extras from the Venotrain accessories range are useful for ensuring that your patients feel comfortable using and wearing their Venotrain compression stockings. They provide effective treatment support, make it easier to put on the products and care for the compression stockings.

01 Special detergent

cleans gently, ensuring careful treatment of your products, and providing lasting protection

02 Rubber gloves

help with putting the compression stockings on correctly

VenoTrain® glider

COMPACT AID FOR PUTTING ON AND TAKING OFF STOCKINGS

The VenoTrain glider is a practical aid for putting on and taking off medical compression stockings. It can be prescribed by a physician. The lightweight, hard-wearing material makes the stocking glide effortlessly over the arm or leg. It is suitable for compression stockings with an open or closed toe. Saving space and time, it is the ideal companion when you're out and about.

FEATURES

- Extremely lightweight, robust, and tear-resistant
- Easy to handle
- Ideal for travel

TAKING OFF THE STOCKINGS

VenoTrain® glider plus

ROBUST DONNING AID

The VenoTrain glider plus is a robust donning aid with an ergonomic design for all types of medical compression stockings. It can be prescribed by the physician.

Folding handles make it easy to put on the stockings, avoiding the need to bend down. It has been tested by an independent institute for ease of use, even for customers with restricted mobility.

FEATURES

- A compact, ergonomic design, light metal frame with folding handles, easy to use without the need for any great effort
